SUMMARY

Full-Stack Software Engineer with 1.5+ years of experience building scalable web applications using React (TypeScript) and Node.js. Experienced in RESTful API development, secure authentication implementation. Skilled in PostgreSQL, Supabase, and AWS, delivering reliable and production-ready applications.

TECHNICAL SKILLS

Languages & Frameworks: React.js, TypeScript, NextJS, Tailwind CSS, Node.js, Express.js, Java

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (CloudWatch, Lambda, S3), Docker

Tools: GitHub, GitLab, Postman, JIRA

WORK EXPERIENCE

Software Engineer – AVASOFT, Chennai Sep 2024 – Jan 2026

- Contributed to full-stack development of enterprise and retail applications using React (TypeScript), Node.js, and PostgreSQL, designing RESTful APIs and scalable backend systems in an Agile environment.
- Optimized API performance and database queries, supported production systems using AWS (API Gateway, CloudWatch), and collaborated with cross-functional teams to deliver reliable, production-ready features

PROJECTS

DBXAIValueRoadmap - Frontend(React + TypeScript)

- Built modular, responsive UI components using React, TypeScript, and Redux Toolkit, integrating 20-25 RESTful APIs to drive dynamic dashboards and workflows.
- Enhanced performance and UX by implementing debounced search, lazy loading with Intersection Observer, and API polling for real-time updates.
- Developed advanced interactive UI features including drag-and-drop reordering, dynamic grid/table management, Excel export, organizational tree map visualization, optimized scrolling for large datasets, and seamless sidebar/chatbot toggle functionality with state-driven updates aligned to Figma designs.

RacPAD (React.js ,Node.js, PostgreSQL)

- Built and maintained a full-stack rent-to-own retail platform using React, Node.js, and PostgreSQL, supporting inventory, deliveries, and reconciliation across US and Mexico stores.
- Optimized multi-store inventory and delivery workflows with centralized assignments, pickup tracking, and real-time dashboards, while enabling regional scalability through English–Spanish localization and multi-currency (USD/MXN) support.
- Improved API performance by restructuring backend request sequencing and eliminating redundant calls, reducing response time and enhancing frontend load efficiency, with secure REST integrations and production monitoring using AWS (API Gateway, CloudWatch).

MedRemind – Missed Medication Alert System

Tech Stack: React, Supabase (PostgreSQL, Auth), Vercel, Resend

- Built a full-stack missed-medication alert system using React and Supabase, implementing secure authentication with Supabase Auth, form handling with React Hook Form, and Zod-based validation for reliable user onboarding and dose tracking.
- Developed cron-based background jobs to detect medications not marked as taken within 1 hour and trigger automated caregiver email alerts via Resend, supported by PostgreSQL schemas and deployed on Vercel.

EDUCATION

B.Sc. Electronics & Communication Science
Alpha Arts & Science College

Chennai | 2021 – 2024
